AdditionalComments:	I put 10 in questions 13, 15 and 16, but I don't really know how many times the previous owners of our house used the creek. They told me they used it. I would also like to understand why the establishment creek is not in the same situation as the big bottom, since it the big bottom flows in to the establishment less than a mile from the source of the sewage.

Reason for contact:

Mr. Naeger was returning my phone message from yesterday. I had contacted him to clarify whether or not he recreated in any way on Big Bottom Creek above the confluence with Indian Creek. He said that he does NOT use Big Bottom Cr. above the confluence with Indian Creek. He said that the pools he uses are at the confluence and below, and that upstream of the confluence is too shallow/dry for fishing or swimming.

Comments:

This is relevant because the Department is proposing in the current round of rulemaking to redesignate Big Bottom from the confluence with Indian Cr to the confluence with Establishment Cr. as Indian Creek. So in the future, instead of being classified as Big Bottom Cr., this stretch will be classified as Indian Cr. This is the stretch where Mr. Naeger's comments refer to, so they will need to be filed with Indian Cr. in addition to Big Bottom.
